Education

Nitte Meenakshi Institute of Technology, Bengaluru <i>Pursuing B.E. in Artificial Intelligence and Machine Learning</i>	2023–2027 <i>GPA: 9.29</i>
St Karen’s Secondary School, Patna <i>Class 12th, CBSE</i>	2021–2022 <i>89%</i>
DAV Public School, Patna <i>Class 10th, CBSE</i>	2019–2020 <i>89.4%</i>

Courses & Skills

Coursework: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Machine Learning, Probability & Statistics

Languages: Python, SQL, C++

Machine Learning: Supervised Learning, Classification, Regression, NLP, Prompt Engineering, Feature Engineering, Model Evaluation

Tools: Git, NumPy, Pandas, Scikit-Learn, Power BI, Tableau, Jupyter Notebook, Streamlit

Projects

- AI-Powered Sales Forecasting Dashboard** | *Python, XGBoost, Power BI*
 - Developed a machine learning-based sales forecasting pipeline using XGBoost regression, feature engineering, and exploratory data analysis on the Rossmann Store Sales dataset to predict future sales trends.
 - Evaluated model performance using regression metrics and visualized forecast trends through an interactive Power BI dashboard to support data-driven decision making.
- Customer Churn Prediction System** | *Python, Machine Learning, Streamlit, Power BI*
 - Developed a customer churn prediction system using supervised machine learning algorithms including Logistic Regression, Random Forest, and XGBoost after performing data preprocessing, feature scaling, and feature engineering.
 - Compared model performance using Accuracy, Precision, Recall, and ROC-AUC metrics, and deployed insights through Streamlit and Power BI dashboards for risk assessment and customer retention analysis.
- AI-Powered Customer Support Chatbot** | *Python, Streamlit, LLMs*
 - Developed an LLM-powered conversational chatbot using Groq-powered LLaMA 3.1, integrating APIs, prompt engineering, and context-aware response generation for real-time conversational AI.
 - Implemented conversation memory, chat history management, and Streamlit-based deployment to support multi-turn interactions and improved user experience.

Experience

- Machine Learning Intern** | *Future Interns*

Dec 2025

 - Worked on end-to-end machine learning workflows involving data preprocessing, feature engineering, predictive modeling, and model evaluation using Python and Scikit-Learn.
 - Built and assessed supervised learning solutions on real-world datasets while applying statistical analysis and data-driven problem-solving techniques.

Achievements

- Developed an AI-based internship recommendation system during Smart India Hackathon 2025 using machine learning and recommendation techniques.
- Solved 150+ Data Structures and Algorithms problems on LeetCode covering arrays, trees, graphs, recursion, dynamic programming, and greedy algorithms.

Certifications

- Applied Data Science with Python
- Agentic AI Projects Workshop, Hebbale Academy
- SQL Certification Course
